

Element Wood Sustainability Practices

Water-based adhesives are used across all product lines where possible to ensure low-emitting solutions.

Comply fully with the letter and spirit of environmental laws and regulations.

Minimize our use of materials, water and energy, and purchase supplies that are designed and manufactured to cause the least amount of impact to the environment.

Reduce, re-use and recycle our waste materials whenever possible.

Wherever practical conduct our business travel in ways that minimize impacts to the environment.

Encourage our customers and others we work with to improve their environmental performance.

Whenever feasible use raw materials recycled from other sources.

Monitor all scrap produced and recycling wherever feasible.

Minimize packaging to what is absolutely necessary to ensure the product is stored and delivered to the customer undamaged.

Consider the environmental impact of proposed new investments as part of our assessment procedure.

This policy statement confirms Element Wood's intent to create and implement sound environmental principles throughout the organization and is available to all employees and the public through our website and upon request.

Use only raw material from timber harvested from certified sustainably managed timberlands

Measure and mitigate the environmental impacts of our manufacturing process

Meet or exceed all environmental regulations regarding waste material

Utilize waste fiber as biofuel

Incorporate environmental aspects in our product development

PEFC & FSC Available

Our Products are PEFC & FSC available in accordance with EUTR in Europe and The Lacey Act in the U.S. Our factory has got the PEFC, and we can offer both PEFC Wood Worktop and FSC Worktops; PEFC Oak, FSC

Oak, PEFC Walnut, FSC Walnut. If you need any wood products with certification, please feel free to contact us.

The majority of materials we offer come from European and North American forests where policy and standards of responsible forest management are met.

Our African timber is purchased legally, from dedicated agents that are able to supply chain of custody.
